

Description:

COAIS C consists of a cleaner based on combined acids and tens active elements. It has the capacity to dissolve cement, concrete, mortar and rust waste on pavements, walls, etc.

Uses:

It is used for cleaning floors, walls, brick slips, reinforced wooden structures, etc. Do not use this product on metallic or stone surfaces. Before cleaning the rust stains on stone, test previously since it may attack some components.

Features & benefits:

EXCELLENT CLEANING PROPERTIES.GREAT EFFICIENCY.

Surface preparation:

The background of application does not require any special treatment.

Application:

- Apply with a brush or paint brush.
- Fully dampen the wastes, stains, rust, etc and leave to act for 5 minutes approximately.
- Then rinse thoroughly with water so as to eliminate any trace of COAIS.
- It is hard applied(without diluting) or by diluting in water in a proportion of 1:5.
- When treating small pieces, it is recommended to soak them in COAIS.
- It is recommended to test previously. After 5 days, check the result so as to observe for any changes in colour or shine.
- Iron based tools must be dried completely upon contact with COAIS so as to prevent them from rusting.

TechnicalFeatures:

- Density: 1.05 Kg/Litre \pm 0.05
Colour/s: transparent.
Acid index: 265 \pm 15
- : Soluble in water.
 - : Great penetrating and cleaning power.
 - : Great acid power and tensoactive properties.
 - : Great dissolving capacity(concrete, mortar, cement wastes, etc).
 - : It eliminates oxide wastes.

Coverage:

10 to 15 m2 per l.

Clean up:

Clean using large amounts of water.

Storage:

It is recommended to store this product for 3 years in tightly closed original packages.

The information provided on this technical data sheet and particularly the recommendations for the application and use of the product is based on our current knowledge and are provided in good faith, considering that the products are used, handled and stored under normal conditions and within the limits of it's useful life. The possible differences between the materials, supports, and real conditions in the application site can be so important that it is no possible to establish a warranty with this document or any other information provided. The user must verify with a suitability test that the product conforms to the required use. Users should refer to the information included in the last technical data sheet edition.
