

Description:

CARCOMAIS is a liquid product based on biocide substances. It is used for protection against fungal and insect attack (wood worm) in wood as well as rotting, through its preventive application. It also protects wood against bleakness.

Uses:

It is used to protect window and door frameworks and leaves, shutters, valances and curtains to be rolled up in wood, furniture, decorative sets, floors, structures, stairs, handrails, balustrades, fences and wooden art objects.

Features & benefits:

EASY APPLICATION. GREAT EFFICIENCY.

Surface preparation:

Upon tracing the origin of wood worm, clean dust and loose particles thoroughly, by using a vacuum cleaner, clean compressed air or a brush.

Application:

- Apply using a small brush, spray or by soaking when treating small pieces.
- Fill the pores completely until the product penetrates deeply so as to restore the molecular structure of the wood surface.
- It is finally plastered, varnished or painted using TEAIS products for being exclusively compatible.

Technical Features:

Density: 0.83 Kg/Litre \pm 0.05 at 20°C

-: Great penetrating and fungicidal effect.

Viscosity: 12 \pm 3 s at 20°C. Ford cup: 4 mm.

-: It stabilises wood and prevents it from disintegrating.

-: It becomes colourless after drying.

-: Greater adherence and durability of paints and finishing varnishes as well as uniform application.

-: It does not colour finishing products.

-: Easy application.

-: Toxic upon inhalation.

Colour/s: transparent.

Coverage:

4 to 6 m² per l.

Clean up:

Clean using our greasy solvent DISOLUAIS.

Storage:

It is recommended to store this product for 2 years in tightly closed original packages, protected against bleakness and unexposed to extreme temperatures.

The information provided on this technical data sheet and particularly the recommendations for the application and use of the product is based on our current knowledge and are provided in good faith, considering that the products are used, handled and stored under normal conditions and within the limits of its useful life. The possible differences between the materials, supports, and real conditions in the application site can be so important that it is no possible to establish a warranty with this document or any other information provided. The user must verify with a suitability test that the product conforms to the required use. Users should refer to the information included in the last technical data sheet edition.
